xxxxxxxxxxxx A world in a hand xxxxxxxxxxxx

UMEOX Design Consultant

*The earth is round, all the heavenly bodies are round; they all move on round or elliptical orbits.
This same image of circular globe-shaped mini worlds orbiting around each other follows us right down to the micro-cosmos.
We are even aroused by round forms in species propagation related eroticism.
Why should I join the straying mass who want to make everything angular?
I am going to pursue Galileo Galilei's philosophy: my world is also round.*
